Who We Are

Canada Keli is an Alberta-based engineering, fabrication and construction company providing integrated EPC, module fabrication, maintenance and production chemical solutions to Canada's energy industry.

With local execution capabilities and the support of our parent company's over 40 years of industry experience, we deliver safe reliable and cost-effective solutions throughout the project cycles

Why Canada Keli

We combine engineering expertise, fabrication capability, and field execution to deliver safe, reliable and cost-effective solutions for oil and gas industry.

LOCAL ALBERTA PRESENCE

Our Nisku fabrication facility provides large-scale module fabrication, structure steel and piping systems with strict quality control.

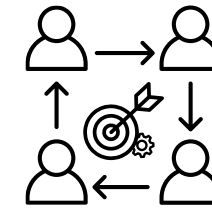

INTEGRATED EXECUTION

Engineering, procurement, fabrication, construction and commissioning delivered under one integrated team from concept to completion.

PROVEN PROJECT DELIVERY

Successfully delivered fabrication, construction and maintenance projects for Canada's leading energy companies.

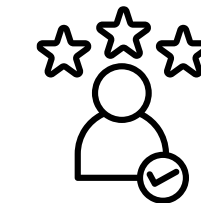

MULTI-DISCIPLINARY WORKFORCE

Engineering expertise across mechanical, piping, structural, electrical, instrumentation and civil disciplines.

STRONG SAFETY CULTURE

COR Certified with a zero-compromise approach to protecting people and environment.

40+ YEARS OF EXPERIENCE

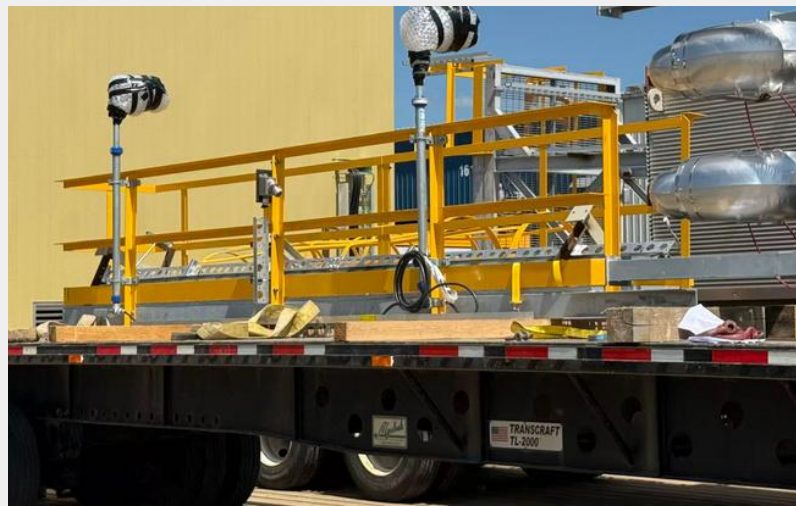

Supported by the strength and resources of our parent company with over four decades in the industry.

What We Do

From engineering and fabrication to construction, maintenance and chemical solutions, we deliver Integrated services tailored to the needs of Canada's oil and gas industry.

EPC & CONSTRUCTION

End-to-end EPC services, delivering safe, reliable and cost-effective solutions.

MODULE FABRICATION

High-quality fabrication in our Alberta facility for a wide range of modules and structures.

OPERATIONS & MAINTENANCE

Reliable maintenance services to maximize asset performance and minimize downtime.

PRODUCTION CHEMICAL SOLUTIONS

Innovative chemical treatment solutions to optimize production and protect assets.

OUR CORE SERVICE AREAS

EPC SOLUTIONS

FABRICATION & WELDING

CONSTRUCTION & MAINTENANCE

CHEMICAL SOLUTIONS

Qualifications & Certificates

We are certified to meet the highest standards of safety, engineering, fabrication, and project execution across Canada's energy industry.

CWB

Certified
Welding

CWB certified welding
program ensuring
quality and integrity.

ABSA

Authorized
Organization

Authorized by ABSA for
the design, fabrication
and inspection of pressure
equipment.

ISNetworld

Registered
Contractor

Prequalified through
ISNetworld for safe and
reliable performance.

COR

Certificate of
Recognition

Recognized for our health
and safety management
excellence

APEGA

Professional
Engineering

Registered with APEGA –
Alberta's association for
engineering professionals.

ComplyWorks

Verified
Supplier

Verified supplier through
ComplyWorks for due
diligence and compliance.

NISKU

FABRICATION FACILITY

Purpose-built Nisku yard delivering module fabrication, structural steel, piping, E&I support and industrial assembly services across Western Canada.

CORE CAPABILITIES

WELDING & FABRICATION

- SMAW, FCAW, GMAW, GTAW
- Structural steel
- Module / skid fabrication

STEEL & PIPING

- Piping fabrication
- Piping modules
- Industrial assemblies

CUTTING & PREPARATION

- Cutting and band saw
- Pipe preparation
- Fit-up support

ELECTRICAL & INSTRUMENTATION

- Cable installation
- Instrument support
- Panel fabrication

MATERIAL LOGISTICS

- Overhead crane
- Forklifts / telehandler
- Laydown yard

QUALITY & TESTING

- In-house QA/QC
- CWB certified welders
- NDT coordination

BUILDING ON SUCCESS. DELIVERING EXCELLENCE. CREATING VALUE FOR OUR CLIENTS.

Operations & Maintenance

Reliable field support for safe, efficient industrial operations.

Safety First

Zero compromise on safe work execution

Reliable Delivery

Dependable performance when uptime matters

Cost Efficient

Preventive care that reduces downtime

Experienced Team

Skilled professionals clients can trust

PLAN → PREVENT → MONITOR → RESPOND

Industrial O&M Services

Preventive, corrective and turnaround support delivered by experienced field teams.

Core Services

1

Preventive Maintenance

Routine inspections and servicing to prevent unexpected failures.

2

Corrective Maintenance

Fast and effective repairs to restore operations safely.

3

Turnaround Support

Planned turnaround and shutdown support for safe execution.

4

Equipment Support

Mechanical, structural and instrumentation support for field assets.

WE DELIVER INTEGRATED COST REDUCTION & EFFICIENT ENHANCEMENT SOLUTIONS TO CLIENTS.

Chemical Solutions

Integrated chemical solutions for SAGD production

2024

31% Lower OIW vs. baseline

24/7 Field technical support

SAGD Production optimization

Chemical performance testing

On-site technical support

SPECIALIZED CHEMISTRY

- Custom-formulated demulsifiers & reverse demulsifiers
- High-performance corrosion and scale inhibitors
- Produced-water treatment solutions

FIELD TECHNICAL SUPPORT

- On-site troubleshooting and technical support
- Continuous CPF performance monitoring
- Collaborative process optimization

PERFORMANCE OPTIMIZATION

- Chemical dosage optimization
- Separation performance improvement
- Data-driven field recommendations

INTEGRATED CHEMISTRY + FIELD SUPPORT + PERFORMANCE OPTIMIZATION

PROJECT EXPERIENCE & CAPABILITY GROWTH ROADMAP

NEW MAJOR AWARDS

We are proud to announce two newly awarded major projects.

PAD 16 (COOEC)

EBRT (Imperial Oil)

NEWLY AWARDED MAJOR PROJECTS

PAD 16 — COOEC CANADA

Project Profile & Performance Highlights

CANADA
KELI

COOEC
CANADA COMPANY LTD.

PROJECT SUMMARY

Canada Keli is providing comprehensive, multi-disciplinary construction services for the PAD 16 Infill Extension. The execution seamlessly coordinates supermodule fabrication, logistics, piping installation, and electrical / instrumentation works.

- ✓ **Fabrication & Installation:** High-precision mechanical equipment alignment and structural steel assemblies.
- ✓ **Complete Multi-Trade Scope:** Covers electrical routing, lighting, instrumentation & controls, and hydrostatic inspections.

KEY PROJECT SCOPES

- Structural steel fabrication & module assembly
- Equipment installation & process piping spool welding
- Mechanical, piping, and E&I integration works
- Rigorous shop testing, hydrostatic tests, and QC audits
- Secure module transportation preparation & heavy rigging
- On-site heavy lift coordination & final field installation
- Complete mechanical completion & project turnover support

PERFORMANCE HIGHLIGHTS

SCHEDULE RECOVERY

Maintained strong execution velocity, outperforming target recovery lines by **1% to 2%**.

RFI & ENGINEERING

Coordinated and resolved **50+** engineering RFIs, bridging design and field execution.

100% SAFETY COMPLIANCE

Zero fatalities, recordable incidents, or medical cases.

QA/QC EXCELLENCE

0% NCR and a weld repair rate of only **0.01%** over **379** completed joints.

MODULAR DELIVERY

Fabricated, hydrotested and placed multiple supermodules and Alberta-built bridge modules.

CLIENT COLLABORATION

Worked closely with COOEC Canada inspection teams and third-party subcontractors.

IMPERIAL OIL (IOL) — INTEGRATED FABRICATION SERVICES

Project Summary

Under a comprehensive Master Service Agreement, Canada Keli delivers general construction support across Imperial Oil facilities. The contract integrates trades, equipment routing, and high-standard daily progress metrics.

- ✓ **Multidisciplinary Integration:** Piping, electrical heat tracing, civil installations, and HVAC commissioning.
- ✓ **Inspections & Hydrotesting:** Thoroughly executing complex system verifications ahead of client handover.

150+
DAYS DURATION

7

DISCIPLINES & SCOPE OF WORK

-  Structural steel fabrication & modular frame assembly
-  Building envelope systems & exterior cladding installation
-  HVAC equipment, support framing & ductwork integration
-  Piping spool fit-up, code-compliant welding & installation
-  Electrical & instrumentation (E&I) systems and cable trays
-  Trial fit-ups & interface verification for key boiler systems
-  Complete pressure equipment alignment & testing checks

IMPERIAL OIL — PERFORMANCE HIGHLIGHTS

1. INTEGRATED EXECUTION

Maintained continuous alignment between mechanical, structural, insulation, and electrical systems trades, reducing field bottlenecks by **15%**.

2. MECHANICAL

Completed full scope fabrication and installation, including isometric alignment, mechanical fit-ups, and pressure tests to ISO specifications.

3. ELECTRICAL & HEAT TRACING

Installed and inspected critical facility-wide heating circuits and instrumentation control paths to uphold extreme cold weather integrity.

4. TECHNICAL CLARIFICATIONS

Proactively processed critical engineering RFIs to eliminate constructability roadblocks and secure alignment with design directives.

5. RIGOROUS QUALITY AUDITS

Conducted strict non-destructive testing (NDE) and structural component verification, ensuring complete facility turnover documentation.

6. STRUCTURED REPORTING

Enabled detailed project control transparency via structured daily operational updates, material logs, and ongoing cost performance analytics.
